Product data sheet

A4 document holder for the side support of the SMD reel rack

EN | 2026-11-12

Item number: DSWL35890

A4 document holder for mounting on the side support of the mobile SMD reel rack. Setup lists, placement plans or job travellers remain visible directly on the trolley and are not lost during transport.

Description

The holder brings setup lists and work documents in A4 format directly to the reel trolley.

The holder is attached to the side support. This way, the documents travel with the trolley from preparation to the placement line.

In SMD production, a lot depends on the right reels ending up at the right machine. A fixed place for the setup plan reduces search times and mix-ups.

Typical areas of use

• Setup lists on the reel trolley

• Job travellers for production orders

• Test and release records

• Marking trolleys in the reel store

What to look for when choosing

• Format: The holder is designed for A4 documents.

• Mounting: It fits the side support of the mobile reel rack.

• Paper: In the EPA, use ESD-suitable document sleeves wherever possible.

• Quantity: Plan one holder per trolley if each trolley follows one order.

Technical data

Item number	DSWL35890
Supply	on request, quotation with price and pack size

Notes on use

Ordinary paper and plastic sleeves can become charged. In the EPA, therefore, place documents in ESD-suitable sleeves and keep your distance from exposed components.
