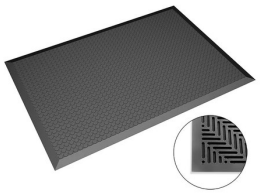
Product data sheet

ESD floor mat 95 x 125 cm | flat studs - black

EN | 2026-11-12



Item number: DSWL43048

ESD floor mat 95 × 125 cm with flat studs: standing surface for workstations with standing work. For connection to a grounding point. Dissipative in combination with ESD shoes or heel grounder. Pack size: 1 pc.

Description

ESD floor mat 950 x 1250 mm, flat studs: ESD floor mat as a grounded standing surface.

Floor mats form the grounded standing surface at workstations with standing work. With a heel grounder or dissipative shoes, the person's charge can flow away via the mat.

The dimensions are 95 × 125 cm. The surface has flat studs.

The mat is connected to a grounding point; the connection is made by a qualified electrician.

Typical areas of use

• Standing workstations at assembly and test stations

• Transition areas to the ESD area

• Operator stations at machines and test equipment

What to look for when choosing

• Dimensions: take account of standing area and walkways.

• Surface: flat studs or hemispherical studs differ in how they feel underfoot.

• Interplay: heel grounder or ESD shoes are needed so that the charge flows away.

Technical data

Item number	DSWL43048
Colour	Black
Standard (manufacturer's data)	DIN EN 61340-5-1
Pack size	1 pc
Dimensions	95 × 125 cm

Notes on use

Floor mats dissipate only when they are connected to the grounding point and the person wears dissipative footwear or a heel grounder.
