Product data sheet

ESD table mat Premium | 120 x 80 cm - blue

EN | 2026-11-12

Item number: DSWL43392

ESD table mat Premium in blue, 120 × 80 cm: work surface for assembly and test stations. Supplied with snap for the grounding connection. Connection to a grounding point required. Routed together with the wrist strap to the same grounding point. Can be printed with your logo on request.

Description

ESD table mat Premium, 1200 x 800 mm: ESD table mat for grounded work surfaces at assembly and test stations.

An ESD table mat forms the grounded work surface: components and tools lie on it, and charge can flow away in a controlled manner. Together with wrist strap and grounding point, a complete ESD workstation is created.

The dimensions are 120 × 80 cm. The colour is blue. A snap is used to connect to the grounding point.

The mat works only if it is connected to a grounding point. The connection to the grounding system must be made by a qualified electrician.

On request we print table mats and table coverings with your logo, company name or a notice text. We clarify feasibility, process and quantity with you.

Typical areas of use

- Placement and assembly stations
- Test and measuring stations
- Repair and service workstations
- Laboratory and development

What to look for when choosing

- Size: the mat should cover the whole work surface, with reserve for tools.
- Connection: the snap and the grounding cord must match the grounding point.
- Roll material or cut piece: roll material suits individual dimensions and larger areas.
- Cleaning: only with suitable cleaners that do not affect the dissipative surface.

Technical data

Item number	DSWL43392
Colour	Blue
Pack size	1 pc
Dimensions	120 × 80 cm

Notes on use

Table coverings do not replace grounding of the person but complement it: mat and wrist strap are routed to the same grounding point. Resistance values and care are given in the datasheet.
