Product data sheet

ESD grounding plug | 1 x 10 mm snap

EN | 2026-11-12

Item number: DSWL32124

ESD grounding plug with 1 × 10 mm snap: distributes grounding to several connections. For coiled cords with snap connection. The number of connections determines how many cords can be connected at the same time.

Description

ESD grounding plug, 1 x 10 mm snap: grounding plug for connecting several grounding cords.

Grounding plugs distribute grounding at the workstation across several connections. This lets you bring wrist strap, mat and other components together at one point.

This plug offers 1 connection(s) with 10 mm snap.

It fits coiled cords with snap connection. The number of connections determines how many cords can be connected at the same time.

Typical areas of use

• ESD workstations with several grounding connections

• Central grounding points at workbenches

• Retrofitting existing workstations

What to look for when choosing

• Number of connections: count all devices at the workstation (wrist strap, mat, tester).

• Connection type: snap size or banana socket must match cords and grounding point.

• Installation: connection to the grounding system by a qualified electrician.

Technical data

Item number	DSWL32124
Colour	Yellow
Pack size	1 pc

Notes on use

Grounding plugs are connected to a tested grounding point. The number of connections determines how many grounding cords can be operated on it at the same time.
