Product data sheet

ESD overshoes, dissipative

EN | 2026-11-12

Item number: PS-ÜS-ESD

ESD overshoes in blue at 35 g/m², low profile, non-slip white outsole and dissipative ESD bands. Surface resistance 2.6 × 10^4 Ω/sq, tested to ANSI/ESD STM11.11 (manufacturer's data). Pack size: 1000 pcs.

Description

ESD overshoes, dissipative: overshoes for cleanroom and ESD areas.

Overshoes prevent shoe soles from carrying dirt and particles into the area. The ESD version additionally dissipates charge via bands or dissipative components.

These are disposable products for visitors and short visits; they are disposed of after use.

Typical areas of use

• Access to cleanrooms and ESD areas

• Visitors, suppliers and service staff

What to look for when choosing

• Design: SMS nonwoven or model with dissipative bands.

• Floor: the dissipative effect depends on a dissipative floor and skin contact of the straps.

Technical data

Item number	PS-ÜS-ESD
Colour	Blue
Fabric weight	35 g/m²
Pack size	1000 pcs

Notes on use

Overshoes protect floors and cleanroom areas from soiling. The dissipative effect depends on the dissipative floor and skin contact of the ESD bands; disposable product.
