Product data sheet

ESD container 600 x 400 x 280 mm

EN | 2026-11-12

Item number: DSWL44789

ESD container in 600 x 400 x 280 mm format for larger assemblies, housings and material in cartons. The medium height offers volume and still fits many rack and trolley systems.

Description

The medium-height container holds bulky assemblies or larger quantities.

At 280 mm high, the container also holds parts that are too tall for flat boxes. With layer pads, the interior can be divided into several levels.

The base dimension of 600 x 400 mm corresponds to common logistics dimensions. This allows the container to be combined with other containers of this size on trolleys and in racks.

Typical areas of use

• Storage of assemblies and housings

• Material provision at the line

• In-plant transport

• Collection of returns and repairs

What to look for when choosing

• Height: 280 mm.

• Base dimension: 600 x 400 mm.

• Subdivision: Can be supplemented with ESD layer pads or foam.

• Cover: Lay-on lid 600 x 400 mm available separately.

Technical data

Item number	DSWL44789
Supply	on request, quotation with price and pack size

Notes on use

Load the container only in the EPA and cover it before it leaves the protected zone. Distribute heavy loads evenly so that the base and handles are not overloaded.
