Product data sheet

ESD bag with zip-lock closure

EN | 2026-11-12

Item numbers: DSWL47231 - DSWL47235 (3 variants)

ESD bags with zip-lock closure in the formats 70 x 100, 150 x 220 and 180 x 250 mm. For small parts and boards that are frequently removed and repacked.

Description

The bags organise components in the warehouse and at the workstation and can be closed repeatedly.

The zip-lock closure can be opened and closed again without tools. This makes the bags suitable for parts that are removed several times, for example in order picking or prototype construction.

The three formats range from a small bag for individual parts to a bag for boards. We will state further catalogue details on request.

Typical areas of use

• Order picking of components

• Prototype construction and laboratory

• Order in the small parts store

• Spare parts for service

What to look for when choosing

• Format: The small bag suits individual parts, the larger ones suit boards.

• Closure: Zip bags are resealable.

• Protection type: Clarify whether shielding packaging is needed for your routes.

Technical data

Variants	3 (item numbers see table)
Supply	on request, quotation with price and pack size

Notes on use

Use the bags in the EPA and ground yourself before opening. Label the contents with labels rather than loose slips of paper. Check reused bags for tears and an intact closure.
