Product data sheet

ESD wedge cushion, 370 x 370 x 100

EN | 2026-11-12

Item number: DSWL94414

ESD wedge cushion in 370x370x100 format for seats in ESD protected areas. The wedge shape supports an upright sitting posture, and the cushion is intended as an ESD item for the EPA.

Description

The wedge cushion improves the seating position at the ESD workstation without bringing an unsuitable cushion into the EPA.

Normal seat cushions can become charged through friction with clothing. An ESD wedge cushion is intended for use in the protected area and complements the ESD chair and clothing.

The wedge shape tilts the pelvis slightly forward and makes it easier to sit upright during long work at a table. The 370x370x100 format suits more compact seats; according to the title, the cushion is designed for 20 mm.

Typical areas of use

• Seated workstations in assembly

• Test stations

• Laboratories

• Soldering workstations

What to look for when choosing

• Format: 370x370x100 for smaller seats; a larger format is available.

• Chair: use the cushion on an ESD chair so that charges can flow away.

• Ergonomics: check the seat height after placing the cushion.

Technical data

Item number	DSWL94414
Supply	on request, quotation with price and pack size

Notes on use

An ESD cushion works in conjunction with ESD chair, floor covering and clothing. Clean the cover only with suitable agents.
