Product data sheet

ESD clipboard with ESD symbol, A4, black

EN | 2026-11-12

Item number: DSWL45976

Black ESD clipboard in A4 format with ESD symbol. It holds work instructions, test records and routing slips at the workstation and is clearly recognisable as an ESD item.

Description

The clipboard brings paper documents into the EPA in an orderly way.

Normal plastic clipboards can become strongly charged when put down and handled. An ESD clipboard is intended for use in the protected area and avoids this additional source of charge at the workstation.

The ESD symbol on the black board shows all employees that the item is intended for the EPA. The A4 format suits common forms and test reports.

Typical areas of use

• Test records in quality control

• Work instructions at the assembly station

• Job routing slips

• Stocktaking in the ESD warehouse

What to look for when choosing

• Format: A4 for standard forms.

• Marking: the ESD symbol makes it easier to separate it from normal office supplies.

• Paper: ESD laminating film is suitable for frequently used sheets.

Technical data

Item number	DSWL45976
Supply	on request, quotation with price and pack size

Notes on use

Place the clipboard on grounded surfaces and avoid normal office supplies in the EPA. Ordinary paper can become charged; documents laminated in ESD film are better suited to permanent documents. Clean the board with an ESD cleaner if needed.
