Product data sheet

Console bracket for post, suitable for grounding testers

EN | 2026-11-12

Item number: DSWL83213

Console bracket for mounting a grounding tester on a post. It fits both grounding testers in this series and brings the instrument to an easily accessible height at the EPA entrance.

Description

The bracket fixes the grounding tester to a post so that it is within easy reach at the entrance.

Grounding testers are usually located at the entrance to the EPA. With a console bracket you mount the instrument on a post instead of screwing it to the wall or placing it on a table.

The bracket is intended for the two grounding testers with LCD display from this range. The catalogue data does not contain details of the material and post dimensions; we will clarify them before the quotation.

Typical areas of use

• Test stations at the EPA entrance

• Free-standing installation without a wall

• Combination with floor stand

• Converting existing test stations

What to look for when choosing

• Instrument match: For the two grounding testers with LCD display.

• Post: Clarify which post the bracket is to be mounted on.

• Location: Plan the walking route at the entrance.

• Accessories: A floor stand with adapter is available separately.

Technical data

Item number	DSWL83213
Supply	on request, quotation with price and pack size

Notes on use

Mount the tester so that every person can reach it before entering the EPA. For testers with a footplate electrode, the bracket should be positioned so that the instrument and the electrode can be used together comfortably.
