Product data sheet

Shelf for steel rack

EN | 2026-11-12

Item number: DSWL43070

Additional shelf for the matching steel rack from the ESD storage range. With a further shelf you subdivide the rack more finely and create space for containers, magazines and cartons.

Description

The shelf extends an existing steel rack by one further storage level.

Racks grow with stock levels. Instead of setting up a new rack, you add a shelf to the existing one and make better use of the height. The shelf is designed as an accessory for a specific steel rack.

Dimensions, load capacity and surface are not evident from the catalogue data. State the existing rack in your enquiry so that we can check the fit and give you the technical details.

Typical areas of use

• Extending existing storage racks

• Storage for small parts and transport containers

• Rearranging shelf compartments in the component store

• Storage areas in production and goods receipt

What to look for when choosing

• Fit: The shelf belongs to a specific rack type; check your existing rack.

• Load: Clarify the permissible load before you store heavy containers.

• Quantity: Plan how many additional levels you need.

• Grounding: Check how the shelf is integrated into your grounding concept.

Technical data

Item number	DSWL43070
Supply	on request, quotation with price and pack size

Notes on use

If the rack stands in an EPA, it should be integrated into the grounding concept like other furniture. Store sensitive components on the shelf only in ESD-suitable containers or bags.
