Product data sheet

ESD magnifier lamp, black

EN | 2026-11-12

Item numbers: 4 · see variant table

Black ESD magnifier lamp that combines light and magnification in one device. Available in sizes S, M and XXL for test, soldering and assembly stations in ESD protected areas.

Description

The magnifier lamp illuminates the work area and magnifies it at the same time so that fine work succeeds reliably.

When working on small components, you need both: bright light and an enlarged view. The magnifier lamp combines both and is intended as an ESD item for the protected area.

The sizes range from S to XXL; size M is available in two versions with their own item numbers. The black housing matches dark workstation systems.

Typical areas of use

• Manual soldering and rework

• Visual inspection in quality assurance

• Repair of electronics

• Fine assembly

What to look for when choosing

• Size: S for compact stations, XXL for a large lens area.

• Version M: have the differences between the two M variants explained in the quotation.

• Lenses: suitable replacement lenses are available in various strengths.

Technical data

Variants	4 (item numbers see table)
Supply	on request, quotation with price and pack size

Notes on use

Position the lamp so that you sit upright and do not work bent towards the lens. Cover the lens when not in use to avoid dust.
