Product data sheet

ESD waste bag, 40 l

EN | 2026-11-12

Item number: DSWL91908

ESD waste bag with a volume of 40 l for waste bins in the EPA. This way, you do not bring ordinary plastic bags, which become charged when inserted and emptied, into the protected area.

Description

The waste bag is intended for waste bins at ESD workstations.

Ordinary plastic waste bags can become strongly charged when pulled apart and emptied. An ESD waste bag avoids this source of charge right at the workstation.

With a volume of 40 l, the bag fits common waste bins at workstations and in production areas.

Typical areas of use

• Waste bins at soldering stations

• Wastepaper bins in the EPA

• Collection bins in production

• Cleaning trolleys in protected areas

What to look for when choosing

• Volume: the bag holds 40 l.

• Bin: check whether the bag fits your waste bins.

• Combination: ideally use it in ESD-suitable waste bins.

Technical data

Item number	DSWL91908
Supply	on request, quotation with price and pack size

Notes on use

In the EPA, replace all ordinary waste bags with ESD waste bags. Do not place waste bins directly next to sensitive components. Add the bag to your ESD checklist for workstation equipment.
