Product data sheet

ESD polo shirt 150 g/m² with breast pocket, navy

EN | 2026-11-12

Item numbers: DSWL37236, DSWL37134, DSWL37135, DSWL37138, DSWL37150, DSWL37151, DSWL37152, DSWL37155, DSWL43826

ESD polo shirt with breast pocket in navy: 150 g/m², collar, button placket and breast pocket. Fabric of 96 % cotton, 4 % carbon fibre. Available in sizes from XS to 5XL. For assembly, testing and service in ESD areas. Dissipative resistance 10^5 to 10^7 ohm (manufacturer's data).

Description

ESD polo shirt in navy: ESD clothing for electronics manufacturing, assembly and testing.

The polo shirt combines a classic cut with breast pocket and button placket with conductive carbon fibres in the fabric. It is suitable as a lighter alternative to the lab coat or as a base layer underneath when uniform team clothing is wanted in the ESD area.

The fabric weighs 150 g/m² and consists of 96 % cotton, 4 % carbon fibre. The manufacturer states a dissipative resistance of 10^5 to 10^7 ohm. It is available in sizes XS to 5XL.

ESD clothing works only together with grounding of the person. Plan for a wrist strap or heel grounder and a dissipative floor.

Typical areas of use

- Electronics manufacturing and assembly
- Test field, service and maintenance
- Laboratory, development and prototype building
- Warehouse and goods receipt in EPA areas
- Uniform team clothing in the ESD area

What to look for when choosing

- Fabric weight: higher fabric weights mean thicker material; choose according to room climate and wearing time.
- Size: the sizes are given on the product page; for team equipment a size overview in advance is worthwhile.
- Standard and dissipative resistance: you will find the manufacturer's details in the datasheet.
- Care: follow the washing instructions, test ESD properties regularly.

Technical data

Item numbers	DSWL37236, DSWL37134, DSWL37135, DSWL37138, DSWL37150, DSWL37151, DSWL37152, DSWL37155, DSWL43826
Colour	Navy
Sizes	XS to 5XL
Fabric weight	150 g/m²
Material	96 % cotton, 4 % carbon fibre
Dissipative resistance (manufacturer's data)	10^5 to 10^7 ohm
Standard (manufacturer's data)	DIN EN 61340-5-1
Pack size	1 pc

Notes on use

ESD clothing works only in a grounded system: wearer and workstation must be connected via wrist strap or heel grounder and a dissipative floor. Values, sizes and care instructions are given in the datasheet.
