Product data sheet

ESD shelf mat, black, 1800 x 1000 mm, without connections, square-cornered

EN | 2026-11-12

Item number: DSWL83318

Large black ESD shelf mat cut to 1800 x 1000 mm, without connections and with square-cornered edges. It covers wide, deep storage surfaces in one piece and is grounded via your shelf or a cord.

Description

At 1800 x 1000 mm, this cut piece is intended for large storage and shelf surfaces.

Covering large surfaces in one piece saves joints and overlaps. This is practical with heavy-duty shelving or storage tables on which whole assemblies or devices stand.

The mat has no connections and square-cornered edges. Grounding is via the shelving system or a separate grounding cord with a clamp.

Typical areas of use

• Heavy-duty shelving for devices and assemblies

• Large storage surfaces in shipping

• Storage surfaces for equipment repair

• Work surfaces at test rigs

What to look for when choosing

• Dimension: the cut piece measures 1800 x 1000 mm.

• Connections: none; you plan the grounding separately.

• Edges: square-cornered for right-angled surfaces.

• Handling: allow enough space for alignment during installation.

Technical data

Item number	DSWL83318
Supply	on request, quotation with price and pack size

Notes on use

Lay the mat flat without wrinkles and secure the grounding via a clamp or the grounded shelf. For large surfaces, it is worth measuring at several points to check dissipation across the whole surface.
