Product data sheet

ESD sweat jacket 300 g/m² with zip, royal blue

EN | 2026-11-12

Item numbers: DSWL92484, DSWL92485, DSWL92486, DSWL92487, DSWL92488, DSWL92489, DSWL92490, DSWL92491, DSWL92492

The ESD sweat jacket in royal blue closes with a full-length zip and has a stand-up collar. The sleeves end in knitted cuffs, and the ESD symbol sits on the left sleeve. The 300 g/m² fabric contains 10 % conductive carbon fibres. Unisex, sizes XS to 5XL.

Description

ESD sweat jacket in royal blue: ESD clothing for electronics manufacturing, assembly and testing.

The ESD sweat jacket with zip can be opened and closed quickly when needed and suits workstations with changing temperatures. Conductive carbon fibres in the fabric dissipate charge.

The fabric weighs 300 g/m² and consists of 45 % polyester, 45 % cotton and 10 % conductive carbon fibres. The manufacturer states a dissipative resistance of 10^6 to 10^7 ohm. It is available in sizes XS to 5XL.

ESD clothing works only together with grounding of the person. Plan for a wrist strap or heel grounder and a dissipative floor.

Typical areas of use

- Electronics manufacturing and assembly
- Test field, service and maintenance
- Laboratory, development and prototype building
- Warehouse and goods receipt in EPA areas
- Uniform team clothing in the ESD area

What to look for when choosing

- Fabric weight: higher fabric weights mean thicker material; choose according to room climate and wearing time.
- Size: the sizes are given on the product page; for team equipment a size overview in advance is worthwhile.
- Standard and dissipative resistance: you will find the manufacturer's details in the datasheet.
- Care: follow the washing instructions, test ESD properties regularly.

Technical data

Item numbers	DSWL92484, DSWL92485, DSWL92486, DSWL92487, DSWL92488, DSWL92489, DSWL92490, DSWL92491, DSWL92492
Colour	Royal blue
Sizes	XS to 5XL
Fabric weight	300 g/m²
Material	45 % polyester, 45 % cotton, 10 % conductive carbon fibres
Dissipative resistance (manufacturer's data)	10^6 to 10^7 ohm
Standard (manufacturer's data)	IEC 61340-5-1
Pack size	1 pc

Notes on use

ESD clothing works only in a grounded system: wearer and workstation must be connected via wrist strap or heel grounder and a dissipative floor. Values, sizes and care instructions are given in the datasheet.
