Product data sheet

Side support without handle for mobile SMD reel rack

EN | 2026-11-12

Item number: DSWL35889

Side support without handle for the mobile SMD reel rack. It forms the second side wall of the trolley, carries the trays and keeps the structure stable without needing extra space in aisles.

Description

The support without a handle completes the reel trolley on the opposite side.

Together with the support with handle, it forms the frame for the trays. Because no handle protrudes, the trolley stays compact on this side.

The support is connected to the base plate. A version without a handle on both sides can also make sense for trolleys that are only parked and rarely moved.

Typical areas of use

• Second side wall of the reel trolley

• Stationary reel racks

• Trolleys for narrow aisles

• Replacement for damaged supports

What to look for when choosing

• Handle: This version has no handle.

• Combination: With the support with handle for a trolley that can be pushed.

• Fit: For the base plate and trays of the mobile reel rack.

• Accessories: Here too, a document holder for working papers can be mounted.

Technical data

Item number	DSWL35889
Supply	on request, quotation with price and pack size

Notes on use

After assembly, the entire trolley should be connected to the ESD floor via the conductive castors. Have this path measured during the regular inspection of the EPA.
